Management review

One ERV company in the Nordics

Since 2015 Europæiske Rejseforsikring A/S in Denmark and ERV Försäkringsaktiebolag (publ) Sweden have had one cross-company organizational structure. In 2017 we aligned the legal structure of the two companies and thereby cemented the position as one Nordic insurance company – ERV Nordic.

In legal terms, Europæiske Rejseforsikring A/S in Denmark was the continuing entity whereas ERV Försäkringsaktiebolag (publ) continued as a branch of Europæiske Rejseforsikring A/S by the legal name of Europeiska ERV Filial. Both the Danish and Swedish entities have locally continued with their brand names and logos; Europæiske ERV and Europeiska ERV.

In this annual report, we will use the term ERV Nordic when referring to both Europæiske ERV and Europeiska ERV. When only referring to Europæiske ERV we will use ERV Denmark and similarly with Europeiska ERV we will use the term ERV Sweden.

Financial result in 2022 affected by Omicron wave, air traffic chaos and investment losses

Considering the extraordinary circumstances ERV Nordic delivered a reasonable financial result of DKK -43.4m in 2022. The Omicron wave and the actions taken by

authorities as well as air traffic chaos during 2022 had a significant negative impact in regards to travel insurance claims and customer service efforts. Further, investment result was negative based on lowered SEK currency exchange rate and realized and unrealized bond losses in a volatile market impacted by the war in Ukraine and rising inflation.

Our diversified Nordic market and product approach partially reduced the negative impact and enabled the company to maintain a solid financial position. Compared to 2021 we managed to increase the Gross Premium Written and despite increased future-proofing project costs, administrative expenses were kept stable.

Travel Insurance of the year 2022

ERV Nordic won RejseforsikringsGuidens annual Travel Insurance of the Year award in 2022. The award is given based on best coverage, customer reviews and prices for travel insurance companies and agents in the Danish market. The award is presented as a guide to travel insurance customers. We won two of the three subcategories that together make up the winner, namely Best Price and Best Customer Reviews. In the Best Coverages category, we finished as second best.

“We work to make customers feel safe under all circumstances”

Our mission

“We work to make customers feel safe under all circumstances”

Our mission is to ensure that travelers and people with special, mostly free time related insurance needs always will be adequately insured by us.

Our vision

Our vision is to be the market leading, internationally capable, Nordic niche insurer that enhances quality of life of our customers with customized, simple, easy and quick solutions relating to travel and other free time related special risks. This vision is also reflected in the ERV Groups eight values, which are:

- **Customer focus**
- **Excellence**
- **Courage**
- **Passion**
- **Teamwork**
- **Forward looking & Sustainable**
- **Openness & Trust**
- **Leadership & Responsibility**

Part of a strong Group

ERV Nordic is a subsidiary 100% owned by ERGO Reiseversicherung AG, which in turn is part of ERGO Group AG and Munich RE Group - the international reinsurance leader. Our financial system, investment portfolio management and some data reporting are outsourced to companies within the group. Furthermore, a part of the claims handling abroad is outsourced to ECH that is mainly owned by our group.

¹ The legal name of Munich RE Group is Münchener Rückversicherungs-Gesellschaft Aktiengesellschaft

ERV Nordic is associated with the following companies:

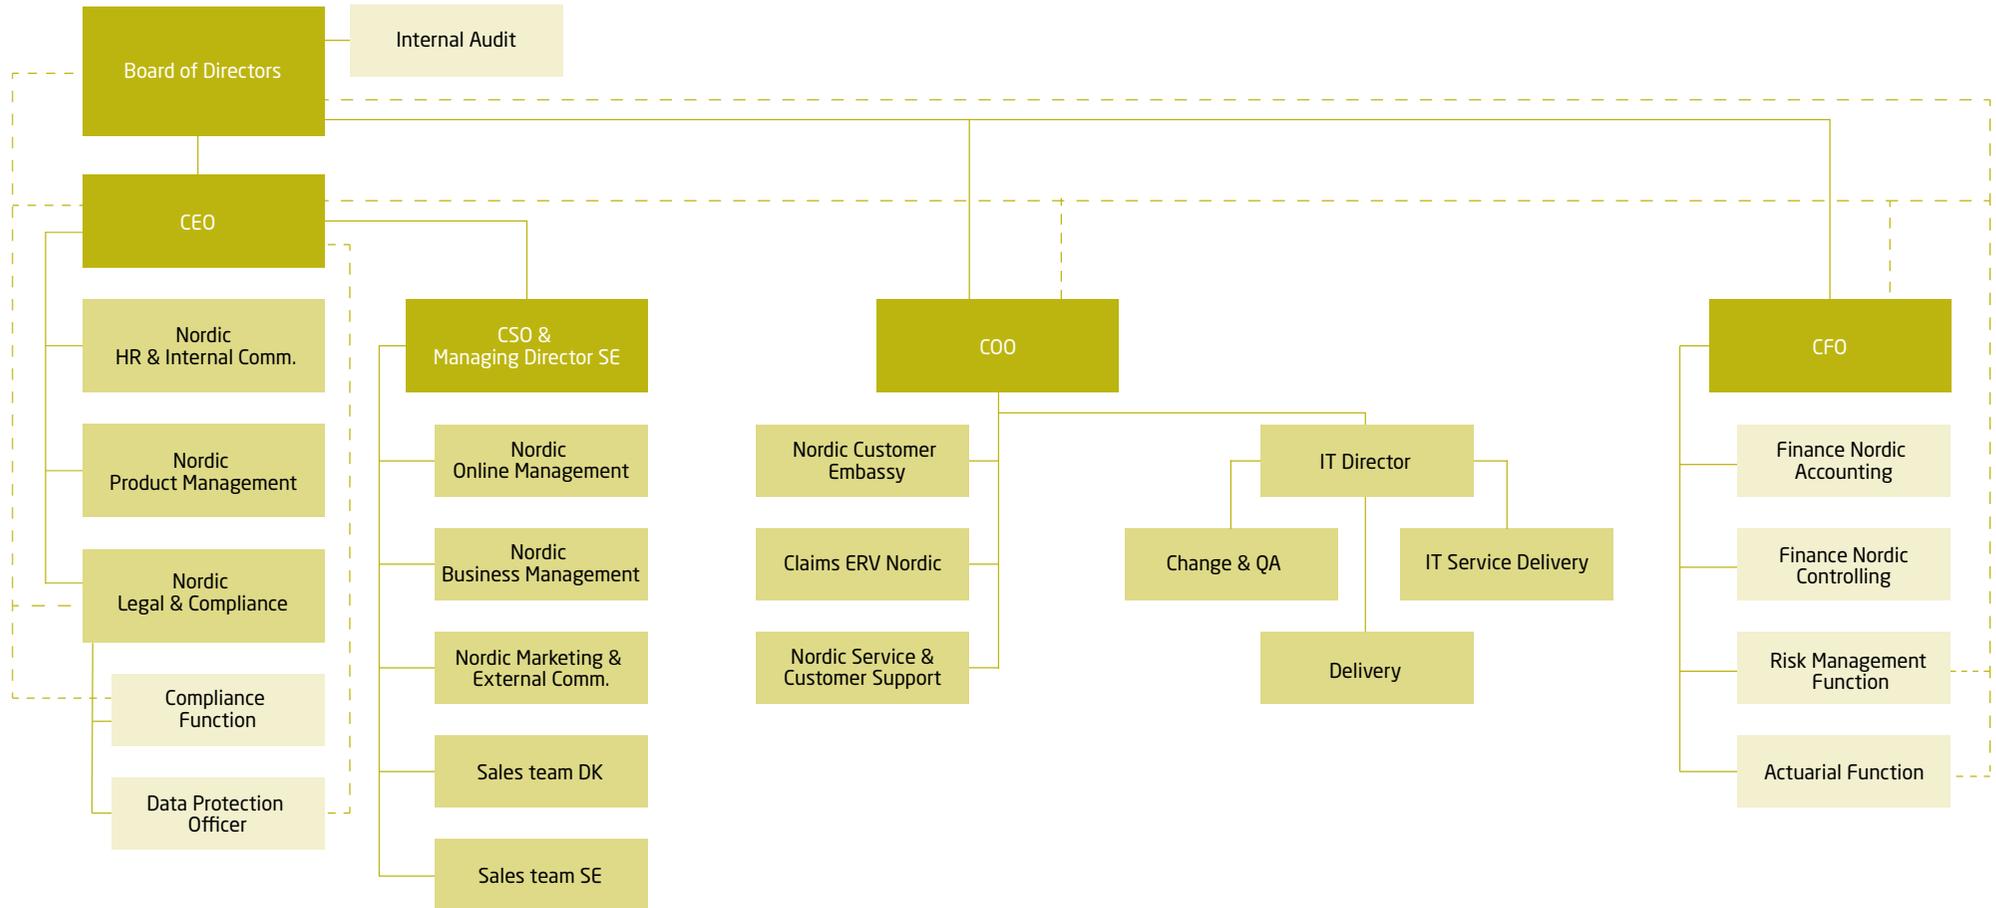

Associated company:

| | | | |
|-----------------------|---------|------------|---------|
| European Ass. Holding | Germany | Assistance | 20.00 % |
|-----------------------|---------|------------|---------|

ERV Nordic is member of the International Travel Insurance Alliance (ITIA) uniting specialized insurers from all around Europe with ambition to expand outside Europe as well. Via this association, we can closely co-operate with many travel insurers on an international level and deliver international solutions to our partners.

Organizational chart

ERV Nordic has the below shown organizational structure:

Our core business

ERV Nordic's primary business areas are providing travel insurance to private customers in the leisure market including BtC, BtBtC; as well as in the corporate market together with health insurance for employees stationed abroad. Our direct business is focused on the markets in Sweden and Denmark. Through insurance professionals and distribution partners, we are also active in Norway and Finland.

ERV Sweden offer travel insurance through Card schemes as well as more affinity group centred business especially in the areas of jewellery and watches.

The majority of travel insurance policies are sold either as trip-by-trip insurance or as annual travel insurance in connection with ERV Nordic's customers' holiday trips, business trips or expatriation. Main distribution channels for all travel insurance policies and health insurance policies are either direct business or brokers in the relevant markets. ERV Denmark also has a portfolio of international healthcare insurance that has been in run off since 2013.

Strong reputation, digitalization and customer focus

ERV Nordic has a strong business-to-business and end-consumer reputation. As a well-established specialty insurance company, ERV Nordic focus on providing coverage customized to the policyholders needs, rather than offering products with the lowest premium. In addition, it has been a major priority in recent years to invest in

our digital platform where we interact with potential new customers (Sales) as well as existing customers (Policy Administration, Corporate Support and Claims) in state-of-the-art technical applications. Obviously, also, our distribution partners' sales approach has changed and we adjusted to that. Our broker relations mainly build on large international insurance brokers, strong domestic broker networks, or local travel agencies, both individual and organized in groups.

The Nordic insurance market

The customer base consists mainly of cross-border travellers from Denmark and Sweden, both leisure and corporate trips. The small geographical size and northern location of the countries ensures the stability of the market potential as these two factors create a desire for the citizens to travel outside the country. The market competition in Leisure consists primarily of larger insurance companies, which offer the product as part of a package deal with family insurance. In addition to this, the Danish public healthcare system in 2014 changed from covering a part of the health risks related to travel insurance in Europe to cover none (from the yellow card to the blue card), which provided a larger market potential. Changes in the public healthcare system, both on local- and EU level, could contribute positively by increasing demand but also attracted new players to that segment increasing competition.

However, restrictions related to the COVID 19 had significant impact on travel segment and heavily reduced volumes in 2020, 2021

and 2022. A full recovery to levels from year 2019 is expected earliest in 2024.

Similar to Leisure in the business segment, market competition comes from larger insurance companies that cover several insurances outside travel, such as liability and property. In business segment there was also significant COVID 19 impact because majority of companies put on hold business travels.

Business Travel Trends

Companies are reporting an increased number of travel days in their expectations for 2023 as 2022 has also shown a solid increase. In Copenhagen airport 8 out of 10 passengers are back in terms of 2019 levels, and we also see an increase in expat activity as only few COVID-19 restrictions remain, especially within Asia. The high inflation has not yet had negative impact on business travels, as it could potentially force companies to become more cost-conscious, and revert back to technological alternatives such as videoconferencing.

With more people being able to work remotely, because of the influence of the pandemic, 'bleisure' has seen tremendous growth. In relation to a conference or business meeting, people spend an extended vacation in the area while they work. In general men represent 70% of all bleisure travels. Most bleisure travelers work in the technology related sector and account for 26% of all trips. Currently large cities attracts most travelers in combined business and leisure travels.

More countries have been added to the 'war and risk zone list' in 2022, Ukraine, Belarus, Chad, Burkina Faso, Iraq and latest Haiti showing a decrease in worldwide stability. To a higher degree, customers feel the need to address the security of their travels.

Leisure Trends

The trends for leisure travel are under strong influence of war, inflation and climate change. Trend is few trips and travelling more close by due to worries about new viruses and higher prices on flight, accommodation etc. Especially airfares for long haul flights has increased and airlines expects the prices to increase further and not return back to the level before pandemic. Even though the inflation is very high consumers are prioritizing spending their income/savings on leisure travel. They will be using more due to higher price level but also more travellers will spend less money during their travel on restaurants and attractions. The COVID-19 pandemic have created a demand for more meaningful and authentic travel which reflects in the request for more meaningful activities at destination.

Still new entrants are disrupting all facets of the travel industry but also more acquisitions and mergers are taken place. New companies, products, and trends will alter the way we fly, drive, and stay. The development of internet based and mobile technologies drives the demand for a seamless travel experience. Seamless travel refers to travel utilising a variety of products and services organised through a single booking process. Younger travellers will have even higher expectations

that travel should be smooth and better connected and older travellers will need better mobility solutions. The continued growth of international families (where family members, e.g., parents and their children, live in different countries) will mean we travel more according to report done by Amadeus.

Sustainability is a collaborative effort aimed at creating long term impact. This means travellers, governments, businesses, and other organizations are aiming to reduce the negative impact of their travels on the planet. This will result in increased demand for sustainable travel and more efficient and sustainable modes of transport. During COVID 19 the need for security increased the demand for cancellation protection also due to COVID19 illness and more travellers are checking details of travel insurance conditions as a consequence of the pandemic

Trends for Travel insurance market

The Nordic market for free-time and travel insurance is defined by fierce competition, and competitors include both general insurers and niche insurers. In travel insurance ERV Nordic plays a dominating role in the Swedish and Danish market.

In Sweden (different from DK) all large P&C insurers decided to package a travel insurance base cover into their existing home insurance offerings since 15-20 years. This changed the business model for ERV Sweden significantly and switched the offerings to become largely a supplement cover to the (new) market standard base cover. 97% of all Swedes have a home insurance cover. The

coverage is however only up to 45 days and is a basic travel insurance offering.

In Denmark, the P&C insurance companies have covers for travel included in more general insurance products, and increasingly offer extended travel insurance as ad-on.

Pandemic situation related to COVID19 has increased customers' awareness and demand for comprehensive insurance products that could provide customers 'peace of mind'.

Claims handling

ERV Nordic's Assistance Network handles emergency assistance cases that occur in all parts of the world from small cases such as outpatient cases to bigger and more complex cases involving air transport. Many cases are complex medical cases, which are handled in close cooperation with our Groups specialized assistance company ECH. The Euro-Center Assistance office handles all ERV Nordic's assistance service and with service offices on six continents ERV Nordic's customers have one of the world's largest medical networks of experienced professionals and Nordic speaking staff available.

As part of ERV Nordic's strong digital focus, we offer our customers a smooth and convenient online claims handling process. The digital journey is constantly under development with new tools and simplified steps in order to secure a smooth, fast and convenient customer experience.

ERV Nordic Strategy

In order to be a niche leader ERV Nordic continuously needs to improve operational setup and grow faster than market average. That is why ERV Nordic during COVID 19 times has prepared for market recovery by working on automation and process enhancement as well as new business opportunities. In this sense, we have continued our strategic initiatives in the following four focus areas:

- Sustainability
- New Business
- Efficiency & insights
- Digitalization & IT Landscape

Sustainability

As a financial services provider, our direct impact on the environment is limited, since our business model is not energy- or resource-intensive. In the areas where we can have a tangible and beneficial influence, we strive to keep carbon emissions and energy and resource consumption as low as possible. Together with Munich Re and ERGO group we share common targets and initiatives regarding "Ambition 2025" climate targets. Here we aim to move our operational business processes across the ERGO Group to net-zero emissions by 2030. We will strive to sustain current business, customer base and revenues.

In the ERGO Group by 2030 at the latest, we will remove any remaining carbon emissions from the atmosphere, for example by financing reforestation or carbon storage projects, to reach net-zero emissions by that time. We aim to reduce our carbon emissions attributable to the insuring of thermal coal as well as oil and

gas production to net-zero by 2050. ERGO stopped underwriting oil and gas production in the spring of 2022. Since 2021, ERGO has implemented an underwriting ban for corresponding new business. In ERV Nordic we will position us as premium supplier through customized service and offerings, leading in quality as well as ease of use.

New Business

We will develop new products and offerings within and outside our niche through advanced customer analytics and efficient development processes. This is to be done in close collaboration with customers in order to reflect their needs and demands.

Efficiency & insights

We will increase our capability to be compliant towards stakeholders, and at the same time be efficient and customer focused. This will be achieved by using digital systems and tools aligned with clear responsibilities and objectives.

Digitalization & IT Landscape

A basis for all initiatives above. IT and digitalization have to move from IT department to be the centre of everything we do. Digitalization is not just systems, but also requires a new way of working for all functions within ERV Nordic.

ERV Nordic's financial result

In 2022, ERV Nordic realised a negative result after tax of DKK -43.4m, compared to a positive result of DKK 83.4m last year. The extraordinary effects of Omicron wave and the actions taken by authorities as well as

air traffic chaos during 2022 effected a significant negative impact in regards to travel insurance claims and customer service costs. Further, investment result was negative based on lowered SEK currency exchange rate and realized and unrealized bond losses in a volatile market impacted by the war in Ukraine and rising inflation.

Gross written premium amounts to DKK 357.2m compared to DKK 314.0m in 2021, an increase of DKK 43.2m. The increase is due to the positive impact by Leisure insurance sales through our Danish and Swedish travel industry partners and the relative higher Leisure and Corporate travel activity during the summer and autumn of 2022 compared to the same periods in 2021 that was heavier impacted by COVID 19 travel restrictions.

Gross claims incurred amount to DKK 159.1m against DKK 95.3m in 2021, an increase of DKK 63.9m. Compared to 2021 and in particular the first quarter of the year, impacted this year by the Omicron wave, mainly the Leisure and Card claims costs increased significantly. Further, our Corporate segment was also burdened by increased number of major claims related to the increase in travel activities. The gross claims ratio therefore also increased to 44.1%, which is approx. 12 percentage-points higher than in 2021. The result of reinsurance recoveries and change of reinsurer's share of claim provisions shows a cost for ERV Nordic of DKK 19.2m in 2022 against a compensation of DKK 0.8m in 2021. The cost this year is

primarily due to release of reserves for major reinsured COVID 19 claims we received during 2020.

The claims costs net of reinsurance amount to DKK 178.3m against DKK 94.5m in 2021 which is an increase of DKK 83.8m. The claims ratio net of reinsurance is 49.7% against 32.2% in 2021.

Net operating expenses for 2022 amounted to DKK 201.1m against DKK 193.0m in 2021, an increase of DKK 8.1m.

Acquisition costs amount to DKK 126.9m against DKK 117.5m in 2021, an increase of DKK 9.4m. The increase is mainly due to the increased Leisure sales via our Danish and Swedish partners in the travel industry. The administrative expenses amount to DKK 74.5m against DKK 75.9m in 2021, a decrease of DKK 1.4m. We have during the latest year's done technical and operational process improvements and adjustments that lowers our costs levels going forward. However, costs related to air traffic chaos during 2022 and increased future-proofing project costs partly counterbalanced the positive impact by these improvements. Commissions and profit commissions from reinsurance amount to an income of DKK 0.3m compared to 0.4m in 2021. The reinsurance contracts with commission has almost the same volume in 2022 as in 2021 so therefore this income has been stable. The total result of business ceded shows a cost for ERV Nordic of DKK 23.3m in 2022 against a cost of DKK 3.3m in 2021. The cost in 2021 was as expected, while this year's extraordinary cost is due to the net impact of DKK 19.2m by reinsurance claim

recovery incl. reinsurer's share of change in claim provisions due to release of COVID 19 claim reserves from 2020.

The above-described development in sales, claims and operating expenses results in a negative underwriting result of DKK 17.8m compared to a positive result of DKK 5.4m in 2021. The cost ratio including acquisition costs amount to 56.2% against 65.2% in 2021. Total combined ratio net of reinsurance (total costs measured in relation to earned premiums) is 106,7% against 98,6% in 2021.

The total result of investment activities before transfer of technical interest amounts to a loss of DKK 24.9m against a profit of DKK 78.1m in 2021. This year's loss is due to lowered SEK currency exchange rate and realized and unrealized bond losses compared to the one-time effect of selling of shares in affiliated and associated companies last year.

Income from affiliated companies is DKK 0m compared to DKK 72.9m in 2021. The reason for the development is that ERV Nordic no longer hold any shares in affiliated companies. In 2021 shares in affiliated companies was sold to ERGO Reiseversicherung AG giving a substantial investment result as well as simplification of formal governance, accounting and reporting related activities from local as well as Group perspective.

The result from associated companies is generated by 20% shareholding in the small assistance entity EAH that in 2022 did not

produce any result impact. Previously, until 2021, ERV Nordic also held shares in the associated company Euro-Center Holding SE (ECH). The sale of ECH in 2021 generated a profit of DKK 0.4m.

Income from investment properties amounts to DKK 3.4m against DKK 3.7m in 2021. The reduced result is due to increased real-estate agent costs in 2022 compared to the previous year.

Interest income etc. for the year amounts to DKK 3.4m compared to DKK 3.8m in 2021. As in 2021, our investment portfolio mainly consists of low-risk Danish and Swedish government bonds.

ERV Nordic is relatively sensitive to the development of the prices of bonds and exchange rates, etc. The company has had a net loss in connection with realised and unrealised gains & losses of bonds, bond-based unit trusts and exchange rates of a total of DKK 30.7m against a loss of DKK 1.8m in 2021. The significant increased loss compared to last year is mainly due to lowered SEK currency exchange rate and realized and unrealized bond losses in a volatile market impacted by the war in Ukraine and rising inflation.

Interest expenses amount to DKK 0.1m in 2022 compared to DKK 0.1m in 2021.

Administrative expenses related to investments amounts to DKK 0.8m compared to DKK 0.7m in 2021. These expenses are primarily triggered by the services delivered

by Munich Re (Münchener Rückversicherungs-Gesellschaft Aktiengesellschaft) that is our appointed investment asset manager.

Interest on insurance provisions shows a negative impact of DKK 2.6m in 2022 compared to a positive impact of DKK 0.6m in 2021. The development is due to the change from negative to positive interest rates.

Other income amounts to DKK 6.1m in 2022 compared to DKK 7.3m in 2021 and other expenses amounts to DKK 5.1m in 2022 compared DKK 5.2m in 2021. Other income and expenses mainly stem from a number of administration agreements where we deliver our renowned claims handling and assistance services to customers that prefer to self-cover their insurance risks.

Due to our negative ERV Nordic result in 2022, we will have a tax income of DKK 0.9m compared to a tax cost in 2021 of DKK 2.9m.

Receivables from policyholders amount to DKK 8.6m against DKK 5.3m in 2021, whereas receivables from insurance brokers amount to DKK 7.6m against DKK 11.5m in 2021.

At 31 December 2022, the company's total capital and reserves amount to DKK 274.3m and total assets amount to DKK 541.6m.

Uncertainty in respect of recognition and measurement

The statement of the accounted value of certain assets and liabilities is conditioned by applying accounting estimates. The estimates made are based on assumptions which the management finds justifiable but uncertain. The statement of the insurance provisions and domicile are in particular connected to estimates.

Events after 31 December 2022

No events have occurred subsequent to the balance sheet date, which would have a material influence on the financial position of the company.

The result of the year compared to earlier statements

The company expected earlier the following for 2022:

“The travel market recovery to a level from 2019 is not expected before year 2023 in Leisure market and in 2024 in the Corporate segment. That is why we for 2022 still expect a negative impact of COVID 19 on our revenues in both ERV Denmark and ERV Sweden. In line with the lowered travel activities by our customers, we will however also expect lower claim costs. Our investment portfolio consists mainly of low-risk Danish and Swedish government bonds, so stable performance is foreseen. Further result stabilization has also been ensured by sales of shares in the Czech companies ERV CZ and ECH.

In total, this means that the expectations for the 2022 result are in line with 2021, except

for the extraordinary investment result ERV Nordic delivered in 2021 based on the one-time effect of sale of our shares in the Czech companies ERV CZ and ECH.”

Considering the extraordinary circumstances in 2022, ERV Nordic delivered a reasonable financial result of DKK -43.4m in 2022. The Omicron wave and the actions taken by authorities as well as air traffic chaos during 2022 had a significant negative impact in regards to travel insurance claims and customer service efforts. Further, investment result was negative based on lowered SEK currency exchange rate and realized and unrealized bond losses in a volatile market impacted by the war in Ukraine and rising inflation.

Outlook for 2023

The travel market is expected to continue recovering from COVID 19 effects but is on the other hand now impacted by the high inflation and economic stagnation. That is why we for 2023 only expect moderate growth for our Danish and Swedish travel insurance sales. We however expect lower claim costs compared to mainly the extraordinary negative impact of the Omicron wave in 2022. Finally, our investment portfolio, consisting mainly of Danish and Swedish government bonds, is expected to show a more stable performance in 2023 than in 2022.

In total, this means that the expectations for the 2023 result are above 2022.

Management Positions

The Board of Management of ERV Nordic has the following management positions.

Beata Danuta Kalitowska-Zborowska, Chief Executive Officer:

- Member of Board of Management of International Travel Insurance Alliance (ITIA), Munich, Germany

David Kraul, Chief Operating Officer:

- Member of the Board of Directors of Storebrand Helseforsikring AS, Lysaker, Norway

Peter Fobian, Board Member:

- No other managing positions

Sebastian Ambæk Laursen, Board Member:

- No other managing positions

Pay Policy

In accordance with the executive order on pay policy and disclosure requirements on pay roll in financial companies and financial holding companies, ERV Nordic has prepared a pay policy which can be found at this link: <https://www.europaeiske.dk/privat/om-europaeiske/virksomheden/lonpolitik/> Please also see note 7.

Gender Composition in the Company's Governing Body

Section 132a of the Executive Order issued by the Danish Financial Supervisory Authority on financial reports for insurance companies and profession-specific pension funds requires that companies of a certain size set targets for the gender composition of the Board of Directors and the composition of the management and report on the matter. Regarding composition of management, a policy for increasing representation of the

underrepresented gender must be established in case the requirements on composition are not met. On the Board of Directors as well as in management the composition should be a 40/60 pct. distribution or the number/pct. which is closest to 40/60 pct. in accordance to guidance from the Danish Business Authority.

Currently, the Board of Directors excl. the employee elected members consists of 1 woman and 3 men, ERV Nordic does therefore meet the gender distribution requirement to the guidance from the Danish Business Authority.

Regarding management level and the composition hereof, the Board of Management of ERV Nordic currently consists of 3 persons. One member is woman, and 2 members are men. Board of Management thereby meets the composition requirements for gender distribution.

Audit Committee

The Board of Directors of ERV Nordic has established an Audit Committee. The Committee consists of three members of the Board of Directors.

The tasks of the Committee are set out in the "Audit Committee Charter" based on the Act on Approved Auditors and Audit Firms no. 1287 of 20 November 2018. The tasks of the Committee includes monitoring and control of the financial reporting process, the company's internal control system, risk management systems as well as the effectiveness of the internal audit function. Furthermore, the Committee monitors the statutory audit of the Annual Report and the independence of the auditors.

When performing its tasks, the Audit Committee ensures that due regard is given to matters important to the company. The

work of the Audit Committee is based on supervision of historical events and does therefore not include future events, expectations or forecasts.

The Audit Committee held four meetings during 2022. These meetings were spread out during the year and among other held in connection with the yearly reporting to the Company's Board of Directors and the Danish Financial Supervisory Authority.

Risk Management

Risk management is an integral part of our corporate management and is based on the risk strategy and risk appetite decided by the Board of Directors. ERV Nordic is exposed to various types of risks in the daily business and is committed to turning risk into value. Our means of risk management assists in achieving this goal and includes all strategies, methods and processes to

identify, analyse, assess, control, monitor and report, both short- and long-term risks ERV Nordic face or may face in the future.

The Board of Directors has the ultimate responsibility for deciding on ERV Nordic's risk strategy, including the risk appetite. It is reviewed at least on a yearly basis and is considered in all strategic initiatives. Our aim of the risk strategy is to limit the impact of all risks in order to maintain a normal operation. ERV Nordic manages risks on a continuous basis to ensure that the risk exposure is within the risk appetite. If the risk exposure is assessed to be outside the approved risk appetite, then actions are taken to manage and/or mitigate the risks. The risk profile is reported on a quarterly basis to the Board of Management and the Board of Directors.

Organisational set-up of risk management

Risk management is performed at all levels in the organization and is structured according to the three "lines of defence";

1st line: Risk takers

2nd line: Risk Management Function, Actuarial Function, Compliance Function

3rd line: Internal Audit Function

ERV Nordic, in accordance with Solvency II, defines the 2nd and 3rd line of defence as the "Key Functions".

Risk situation

The risk situation at ERV Nordic has been within the Board of Directors risk tolerance

during 2022. Except for the corona crisis and related major claims, we have not faced any material, unexpected risks and the solvency situation has been above our internal trigger levels (yellow trigger equals 140%) as well as regulatory requirements. We acted in the light of the corona crisis and monitored the situation closely, both in terms of the claims development and in regards to our Business Continuity management.

Main risks of ERV Nordic:

- Underwriting risk
- Market risk

Underwriting risk

Underwriting risk arises from inaccurate assessments of the compensations and other costs related to insurance policies. Significant underwriting risk are premium, if losses are higher than expected, and reserve risk, if the reserves set side are not sufficient to cover the ultimate losses.

Relevant policies exist which are set by the Board of Directors. The overarching policy for underwriting risk states that risks originating from the company's insurance business shall be covered or limited to such a level that the company will be able to maintain a normal operation and carry out planned initiatives even in case of a very unfavourable development. One measure taken to limit the underwriting risk, is reinsurance agreements. This limits the risk for most events to a certain level according to the risk appetite set by the Board of Directors.

In the Standard model, this risk is estimated to DKK 194.1m as of December 31 2022.

Market risk

It is the aim of ERV Nordic to control the market risks in such a way that the company obtains a return corresponding to risks taken.

Main market risk:

- Currency risk
- Equity risk
- Property risk
- Market risk concentrations

Currency risk arises as a result of a mismatch in the value of assets and liabilities in the same foreign currency. Internal guidelines, set by the Board of Directors, limits the exposure to a certain level. In terms of the result, the company is sensitive towards the development in currency rates and the prices of bonds, shares and participations.

Currency risk for ERV Nordic is mainly related to the net assets in ERV Sweden denominated in Swedish krona ("SEK"). The merger with ERV Sweden is based on a strategic decision and in line with the risk appetite set by the Board of Directors.

The standard model calculation has been used to assess market risk and the necessary capital for this type of risk. This model demands a capital of DKK 32.4m in order to be able to cover the risk sufficiently with a confidence level of 99.5%, which means that ERV Nordic can meet the policyholders' claims for 199 years out of 200 years.

Credit risk

Credit risk is defined as an economic loss that can arise if the financial situation of a counterparty changes. The credit risk includes both the risk of deterioration of the "rating" of the counterparty and the credit spread risk. Examples are the financial situation of an issuer of securities or a debtor with obligations to ERV Nordic.

In our fixed-income investments, we control the associated credit risk by selecting issuers with appropriate quality and respecting counterparty limits. The rating of external rating agencies is just one of several criteria that we take into account. The majority of our investments consist of securities issued by issuers with very good credit ratings.

In the Standard model, this risk is estimated to DKK 11.4m.

Operational risks

Operational risk is the risk of loss resulting from inadequate or failed internal processes, people and systems or from external events. Operational risk is inevitably linked to the business activities of ERV Nordic. They are addressed in a comprehensive internal control system or through ad-hoc reporting.

ERV Nordic manages operational risk in accordance with internal guidelines and the risk appetite on an ongoing basis. It is reported to the Board of Directors as part of the risk report on a quarterly basis.

The standard model calculation demands a

capital of DKK 10.7m in order to be able to cover the operational risk sufficiently with a confidence level at 99.5%, which means that ERV Nordic can meet the policyholders' claims for 199 years out of 200 years.

Other material risks

ERV Nordic is also exposed to strategic and reputational risk.

Strategic risk are risks arising from wrong business decisions or poor implementation of decisions already taken. ERV Nordic is exposed to a variety of strategic risk such as changes in the customer structure ("demography") and the buying behaviour ("digital disruption"). Additional risks may arise as a result of changes in the competitive environment. Strategic risks usually have an impact lasting over several years and when identified, they are analysed and remedial measures are taken when necessary.

Reputational risk is defined as the risk of damage that occurs if the value or brand name of ERV Nordic deteriorates. The impact ranges from reduced business opportunity to administrative additional expenses.

Ad hoc reporting and regular quarterly communication between the governance functions takes place. In addition, as part of the internal control system, a basic assessment of potential reputational loss for each operational risk is completed by both the Compliance Officer and the Risk Manager. If the risk is assessed as being above the process owner's acceptable range, then a measure is required and monitored.

| Sensitivity Analysis as of 31.12.2022, SCR 125 pct. | | | Stress (Pct.) | SCR (Pct.) |
|---|---------------------------|-------------------------|---------------|------------|
| 1. | Interest rate risk | | 200 % | 156% |
| 2. | Equity risk | | 100% | 167% |
| 3. | Property risk | | 58% | 125% |
| 4. | Spread risk | Danish government bonds | 30% | 125% |
| | | Other government bonds | 82% | 125% |
| | | Other bonds | 93% | 125% |
| 5. | Currency risk | Exposure 1 (USD) | 100% | 163% |
| | | Exposure 2 (SEK) | 76% | 125% |
| | | Exposure 3 (EUR) | 100% | 153% |
| 6. | Counterparty default risk | | | 101% |

Sensitivity Analysis

ERV Nordic has calculated sensitivity analysis on a quarterly basis. The sensitivity analysis done as of December 31 2022 shows that we are able to withstand changes in the significant risk categories.

There are no stresses to the risk categories that will lead to an MCR of 125% nor 100%.

Capital management and requirements

ERV Nordic's Solvency II requirement is calculated on the basis the company's risk profile, and therefore takes into consideration the composition of ERV Nordic's insurance portfolio, cash flow profile, technical provisions, reinsurance program, investment mix and risk diversification.

The Board of Directors of the company has

estimated that a security level of 99.5% has to be used for the capital demands. ERV Nordic has calculated the capital requirement based on a security level of 99,5% and according to the Standard model under Solvency II which means that ERV Nordic can meet the policyholders' claims for 199 years out of 200 years. The model has been tested during the last 3 years and ERV Nordic has always had more than sufficient capital to meet the security level of 99.5%.

The solvency capital requirements (SCR) have been calculated to DKK 137.0m and shall be covered by the company's eligible own funds of DKK 229.2m as of December 31 2022 affecting a solvency ratio of 167%.

Below is shown a five-year overview of the solvency ratio. The main reason for the development of the SII ratio in 2022 compared to

2021 is decreased SII Own Funds due to realised and unrealised losses on bonds, bond-based unit trusts and exchange rates.

| | Solvency ratio |
|------|----------------|
| 2022 | 167% |
| 2021 | 216% |
| 2020 | 197% |
| 2019 | 143% |
| 2018 | 176% |

Fitch rating

ERV Nordic has an 'A+' (stable outlook) Insurer Financial Strength (IFS) Rating from Fitch.

SIGNATURES OF THE BOARD OF MANAGEMENT AND THE BOARD OF DIRECTORS

We have today presented the annual report for 1 January – 31 December 2022 to ERV Nordic.

The annual report has been prepared in accordance with Financial Business Act.

The annual report gives a true and fair view of the company's assets, liabilities and financial position as of 31 December 2022 together with the results of the company's activities for the financial year 1 January – 31 December 2022.

The management report contains a fair and true review of the development of the company's activities and financial performance together with a description of the most significant risks and elements of uncertainty that may have an impact on the company.

We recommend the annual report to be approved at the annual general meeting.
Copenhagen, 12th of April 2023

Independent Auditor's report

To the shareholder of Europæiske Rejseforsikring A/S

Opinion

We have audited the financial statements of Europæiske Rejseforsikring A/S for the financial year 1 January – 31 December 2022, which comprise income statement, statement of comprehensive income, balance sheet, statement of changes in equity and notes, including accounting policies. The financial statements have been prepared in accordance with the Danish Financial Business Act.

In our opinion, the financial statements give a true and fair view of the financial position of the Company at 31 December 2022 and of the results of the Company's operations for the financial year 1 January – 31 December 2022 in accordance with the Danish Financial Business Act.

Our opinion is consistent with our long-form audit report to the Audit Committee and the Board of Directors.

BASIS FOR OPINION

We conducted our audit in accordance with International Standards on Auditing (ISAs) and additional requirements applicable in Denmark. Our responsibilities under those standards and requirements are further described in the "Auditor's responsibilities for the audit of the financial statements" section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We are independent of the Company in accordance with the International Ethics Standards Board for Accountants' Code of

Ethics for Professional Accountants (IESBA Code) and additional requirements applicable in Denmark, and we have fulfilled our other ethical responsibilities in accordance with these rules and requirements.

To the best of our knowledge, we have not provided any prohibited non-audit services as described in article 5(1) of Regulation (EU) no. 537/2014.

Appointment of auditor

At the Annual General Meeting on 30 April 2020, we were elected as auditor for Europæiske Rejseforsikring A/S for the first time. We have been reelected annually by the Annual General Meeting for a total period of three years up to and including the financial year 2022..

KEY AUDIT MATTERS

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the financial statements for the financial year 2022. These matters were addressed during our audit of the financial statements as a whole and in forming our opinion thereon. We do not provide a separate opinion on these matters. For each matter below, our description of how our audit addressed the matter is provided in that context.

We have fulfilled our responsibilities described in the "Auditor's responsibilities for the audit of the financial statements" section, including in relation to the key audit matters below. Our audit included the design and performance of procedures to respond to our assessment of the risks of material misstatement of the financial

statements. The results of our audit procedures, including the procedures performed to address the matters below, provide the basis for our audit opinion on the financial statements.

KEY AUDIT MATTERS

Measurement of claims provisions
Claims provisions totaled to DKK 61 million at 31 December 2022.

The measurement of claims provisions is subject to significant management estimates, including expected losses for incurred claims in current and previous years, as well as unknown claims (IBNR and IBNER provisions).

Reference is made to note 1 for a description of the accounting policies.

How our audit addressed the key audit matter

Our audit procedures performed in cooperation with our actuarial specialists included:

- ▶ Assessment of design and test of effectiveness of key controls in the processes for claims handling and provisions for claims reserves as well as actuarial models applied for calculating IBNR and IBNER provisions.
- ▶ Comparison of data, methods and assumptions used with generally accepted actuarial standards, historic developments and trends
- ▶ Assessment and analyses of the development of run-off results and changes to the models applied and assumptions used compared with last year as well as the development in industry standards.

- ▶ Test of accuracy and completeness of the underlying data on a sample basis as well as recalculation of claims provisions for selected lines of business.

Furthermore, we assessed whether the disclosures relating to risks and uncertainties in respect of claims provisions made meet the relevant accounting rules.

STATEMENT ON THE MANAGEMENT'S REVIEW

Management is responsible for the Management's review.

Our opinion on the financial statements does not cover the Management's review, and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial

statements, our responsibility is to read the Management's review and, in doing so, consider whether the Management's review is materially inconsistent with the financial statements or our knowledge obtained during the audit, or otherwise appears to be materially misstated.

Moreover, it is our responsibility to consider whether the Management's review meets the disclosure requirements of the Danish Financial Business Act.

Based on the work we have performed, we conclude that the Management's review is in accordance with the financial statements and has been prepared in accordance with the requirements of the Danish Financial Business Act. We did not identify any material misstatement of the Management's review.

MANAGEMENT'S RESPONSIBILITIES FOR THE FINANCIAL STATEMENTS

Management is responsible for the preparation of financial statements that give a true and fair view in accordance with the Danish Financial Business Act. Moreover, Management is responsible for such internal control as Management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, Management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting in preparing the financial statements unless Management either intends to liquidate the

Company or to cease operations, or has no realistic alternative but to do so.

AUDITOR'S RESPONSIBILITIES FOR THE AUDIT OF THE FINANCIAL STATEMENTS

Our objectives are to obtain reasonable assurance as to whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs and additional requirements applicable in Denmark will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the

economic decisions of users taken on the basis of the financial statements.

As part of an audit conducted in accordance with ISAs and additional requirements applicable in Denmark, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- ▶ Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations or the override of internal control.

- ▶ Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.

- ▶ Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by Management.

- ▶ Conclude on the appropriateness of Management's use of the going concern basis of accounting in preparing the financial statements and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a

going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

► Evaluate the overall presentation, structure and contents of the financial statements, including the note disclosures, and whether the financial statements represent the underlying transactions and events in a manner that gives a true and fair view.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and communicate to them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

Based on the matters communicated to those charged with governance, we determine which matters were of most importance in our audit of the financial

statements for the current period and therefore are key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

NOTE 1 - ACCOUNTING POLICIES APPLIED

General

The annual report has been prepared in accordance with the Danish Financial Business Act and the executive order issued by the Danish Financial Supervisory Authority on financial reports for insurance companies and profession-specific pension funds.

The company has received permission to prepare the annual report solely in English from the Danish Financial Supervisory Authority.

The annual report is presented in thousand DKK.

Accounting policies are unchanged from last year.

Accounting estimate

The preparation of annual reports under the Danish Financial Supervisory Authority's executive order requires the use of certain critical accounting estimates and requires the management to exercise its judgment in the process of applying the company's accounting policies.

The statement of the accounted value of certain assets and liabilities is conditioned

by applying accounting estimates. The estimates made are based on assumptions which the management finds justifiable but uncertain. The statement of the insurance provisions and domicile are in particular connected to estimates. These estimates are described in more details in the below-mentioned under the individual accounting items.

Recognition and measurement

Assets are recognised in the balance sheet when it is probable that future economic benefits will flow to the company and the value of the asset can be reliably measured.

Liabilities are recognised in the balance sheet when the company has a legal or constructive obligation as a result of a prior event, and it is probable that future economic benefits will flow out of the company, and the value of the liabilities can be measured reliably.

On initial recognition, assets and liabilities are measured at fair value, however tangible and intangible assets are measured at cost. Measurement subsequent to initial recognition is effected as described below for each financial statement item.

Anticipated risks and losses that arise before the time of presentation of the annual report and that confirm or invalidate

affairs and conditions existing at the balance sheet date are considered at recognition and measurement.

Income is recognised in the income statement as earned, whereas costs are recognised by the amounts attributable to this financial period. Value adjustments of financial assets and liabilities are recorded in the income statement unless otherwise described below.

Intra-group transactions

The remuneration for the administration of the group's companies is based on the costs of such administration. The interest charged on intra-group accounts is the market rate when these accounts are not considered current business accounts.

Other services (including reinsurance) rendered as part of ordinary insurance operations to and from intra-group buyers are settled at market rates.

Intra-group trading in assets, including securities, is conducted at market prices. No significant intra-group trading with assets has taken place during the accounting year.

Foreign currency transactions

The company's functional currency is DKK in respect of business and investments originating from Denmark. The functional

currency used by the company's branch in Sweden is SEK.

Receivables and payables recognised in foreign currency are translated at the exchange rate prevailing at the balance sheet date. The difference between the exchange rate prevailing at the balance sheet date and the exchange rate prevailing at the time when such receivables or payables arose or were recognised in the latest annual report is recognised in the income statement as value adjustments.

Profit and loss of the foreign branch is translated into the company's functional currency, DKK, at the exchange rate prevailing at the date of transaction. The value of the branch's balance sheet items are translated at the exchange rate prevailing at the balance sheet date.

Consolidated accounts

The company has chosen not to prepare consolidated accounts in accordance with §134 in the executive order issued by the Danish Financial Supervisory Authority on financial reports for insurance companies and profession-specific pension funds, as the company's ultimate parent company, Münchener Rückversicherungsgesellschaft, Munich, Germany, prepares consolidated accounts in which the company and its subsidiaries are included.

PROFIT AND LOSS ACCOUNT

RESULT OF INSURANCE OPERATIONS

Premium income, net of reinsurance

Premium income, net of reinsurance consists of the premiums collected for the year less ceded reinsurance premiums, adjusted for movements in the unearned premium provision.

Technical interest, net of reinsurance

According to the Danish FSA's executive order, technical interest is presented as a calculated return on the year's average insurance liability provisions, net of reinsurance. The interest is applied according to the expected run-off pattern of the provisions.

Technical interest is reduced by the portion of the increase in net provisions that relates to unwinding of discounting.

Claims incurred, net of reinsurance

Claims incurred, net of reinsurance consist of the claims paid together with direct and indirect costs for claims handling less reinsurance recoveries, adjusted for movements in the outstanding claims reserve.

As a result, claims incurred, net of reinsurance consist of reported and expected claims for the accounting year. Furthermore, run-of gains or losses on previous years' provision for outstanding claims are included in claims incurred. The portion of the increase of the provisions that relates to reduction of term has been transferred to technical interest.

Changes in provisions of claims due to changes in the yield curve and exchange rates are recognized as a value adjustment.

Bonus and premium discounts

Bonus and premium discounts represent anticipated and reimbursed premiums where the amount reimbursed depends on the claims record, and for which the criteria for payment have been defined prior to the financial year or when the business was written.

Insurance operating expenses, net of reinsurance

Insurance operating expenses represent acquisition costs and administrative expenses less reinsurance commissions received. Expenses relating to acquiring and renewing the insurance portfolio are recognised at the time of writing the business. Administrative expenses are accrued to match the financial period.

Investment activities

Income from affiliated companies includes the company's share of the affiliates' net profit.

Income from associates includes the company's share of the associates' net profit.

Income from domicile properties before fair value adjustment represents the profit from property operations less property management expenses for the part of the property which is not used by the company. Profit from property operations derives from rental agreements with tenants. All tenants have less than one-year tenures.

Interest, dividends, etc. represent interest earned, dividends received, etc. during the financial period.

Realised and unrealised investment gains and losses are gains and losses on investments, value adjustment of land and buildings and exchange rate adjustments.

Investment management charges represent expenses relating to the management of investments.

OTHER ITEMS

Other income and expenditure

Other income and expenditure contain income and expenses on administration agreements, which cannot be attributed to the insurance portfolio.

Taxation

Tax on the profit for the year is calculated on the basis of the profit for the year before tax, adjusted for non-taxable income and expenditure.

The company is jointly taxed with Danish group companies. Full intra-group tax equalisation is effected so that the company pays for the utilisation of contingent negative taxable income from the jointly taxed company and the company is refunded by the jointly taxed company for its utilisation of contingent taxable deficits of the company.

Deferred tax related to recapture of previously deducted deficits in foreign branches

or affiliates' entities is included based on an actual assessment of the purpose of the individual entity.

Deferred tax is measured according to the tax rules and at the tax rates in Denmark and Sweden which based on the legislation in force at the balance sheet date will apply when the deferred tax liability is expected to be settled or when the deferred tax asset is expected to be realised.

If deferred tax constitutes a tax asset, it is included in the assets, if it is most probably that it can be used in the future. The tax liability on the contingency reserve (contingent tax) is not provided for in the balance sheet.

The company has not made provisions for deferred tax on contingency funds as it is not likely that a situation will arise within the foreseeable future which will result in taxation.

BALANCE SHEET

Intangible assets

The assets are measured at the acquisition costs with deductions of the write down. A straight-line write down is applied based on the following assessment of the assets' expected useful lives:

Software, presently 3-5 years

Costs that are directly associated with the production of identifiable and unique software products are recognised as intangible

assets. Direct costs include the software development team's employee costs and other directly related overheads. All other costs associated with developing or maintaining computer software are recognised as an expense when incurred.

After completion of the development the asset is written down on a straight-line basis over the expected useful life, however, presently with a maximum period of 5 years. The basis of writing down is reduced by any impairment write downs.

Operating equipment

Furniture and operating equipment are measured at cost price less accumulated write down and any accumulated impairment losses. The cost price includes the purchase price and costs directly related to the purchase of the relevant assets until the time when the assets are ready for use.

The tangible assets are written down on a straight-line basis from the following assessment of the assets' expected useful lives, as follows:

- Furniture and other operating equipment, presently 5 years
- Computer hardware, presently 3 years
- Motor vehicles, presently 5 years

The assets' residual values and useful lives are reviewed at each balance sheet date and adjusted if appropriate.

Gains and losses on disposals and retirements are determined by comparing proceeds with carrying amount. These are included in the income statement. When revalued assets are sold, the amounts included in the revaluation reserve are transferred to retained earnings.

Leasing - Accounting policies before January 1, 2019

Leases are divided into financial and operational leasing liabilities. A lease is recognised as financial when substantially all the risks and gains of owning the leased asset are transferred to the lessee. Other leases are classified as operational.

Leasing costs related to operating leases are recognized on a straight-line basis in the profit and loss statement over the lease period.

Leasing - Accounting policies after January 1, 2019

Before start of a lease contract, the company assesses whether a contract can be determined as a right-of-use asset (ROU asset). A ROU asset has the following conditions:

- The asset is explicitly identifiable
- The company has the right to get almost all the economic benefits from use of the asset throughout the period of use
- The company has the right to choose how to use the asset

The company recognises ROU assets and corresponding lease liabilities with respect to all lease agreements in which it is the lessee, excluding short-term leases (defined as leases with a lease term of 12 months or less) and leases of low value assets. At start or on reassessment of a contract that contains lease components, the company allocates the consideration in the contract to each lease component based on their relative stand-alone prices.

ROU assets and lease liabilities are recognised at the lease commencement date. The ROU assets are initially measured at cost price, which is calculated as the present value of the lease obligation including prepaid lease payments, any direct costs associated with the acquisition and any costs for dismantle and disposal of the asset at the end of the lease period, which the lessee is obliged to pay. ROU assets are depreciated on a straight-line basis over the shortest period of the lease term and the useful life of the assets.

Lease liabilities

Lease liabilities are measured at the present value of the lease payments that are not yet paid, discounted using the rate implicit in the lease. If this rate cannot be determined, the company uses its incremental borrowing rate. Subsequently, the lease liability is measured at amortised cost using the effective interest method and is presented as part of the amount shown under "Leasing liabilities" within Liabilities. It is re-measured when there is a change in future lease payments. An adjustment is made to the

carrying amount of the corresponding ROU asset.

Impairment of intangible assets and operating equipment

Finalized development projects and development projects in progress are tested for impairment in connection with the annual report and during the year if there is any indication of impairment. The carrying amount of other intangible assets and operating equipment is reviewed at least annually to determine whether there is any indication of impairment.

If there are indications of impairment, the carrying amount is written down to the estimated recoverable amount of the asset if this is lower than the carrying amount. The recoverable amount is the higher of an asset's fair value less costs to sell and the expected value in use.

Land and buildings

Land and buildings are measured in the balance sheet at the revalued amount, being the fair value at the date of revaluation, less any subsequent accumulated depreciation. Revaluations are performed regularly to avoid the carrying amount differing from the domicile's fair value at the balance sheet date.

The fair value is calculated based on a market-determined rental income, as well as operating expenses in proportion to the property's required rate of return in percent.

Increases in the revalued carrying amount of land and buildings are credited in equity,

unless the increase corresponds to a decrease previously credited to the income statement. Decreases are credited to the income statement unless the decrease corresponds to an increase previously credited to equity.

The write downs are recognized in the profit and loss account over their useful lives. The expected useful life is measured regularly.

The company assessed at the time of the change-over to the rules of Danish Financial Supervisory Authority's executive order on financial reports that the useful life is 50 years and the scrap value is 70%.

Capital holdings (shares) in affiliated and associated companies

Shareholdings are stated at their equity value using the equity method. As a result, the shareholdings are shown in the balance sheet as the pro rata share of the companies' equity value, and the company's share of the result is included in the profit and loss account under "income from affiliated or associated companies".

The total net revaluation of capital holdings in affiliated and associated companies are included in the net revaluation reserve in equity, if the book value is higher than the cost price.

Other financial assets

Listed bonds and capital investments are stated at the price listed at closing time on the date of the balance sheet. However, drawn bonds are stated at fair value. Unlisted capital investments are stated as

the estimated market value, based on the last available annual accounts of the company in question.

Secured loans are stated as the estimated fair value at the balance sheet date.

The trade day is used as the time of calculation for all investment assets.

Reinsurers' share of provisions for insurance contracts

Contracts entered into by the company with reinsurers under which the company is compensated for losses on one or more contracts issued by the company and that meet the classification requirements for insurance contracts are classified as reinsurance share of the technical provision.

Amounts recoverable from reinsurers are measured consistently with the amounts associated with the reinsured insurance contracts and in accordance with the terms of each reinsurance contract.

The benefits to which the company is entitled under its reinsurance contracts held are recognised as assets and reported as reinsurers' share of claim provisions for insurance contracts.

The reinsurers' share of the provisions for claims is measured at discounted value if such discounting is material. The future payments will be discounted back according to the risk-free interest rates announced by EIOPA without volatility adjustment. The company assesses continuously its

reinsurance assets for impairment. If there is objective evidence that the reinsurance asset is impaired, the company reduces the carrying amount of the reinsurance asset to its recoverable amount and recognises that impairment loss in the income statement.

Debtors

Debtors are stated net of a bad debt reserve calculated on the basis of an individual assessment of the debtors.

Accruals

Accruals, reported under assets, comprise cost paid relating to the following financial period.

EQUITY

Share capital

Shares are classified as equity when there is no obligation to transfer cash or other assets.

Revaluation provisions

Revaluation of owner-occupied property is recognized in other comprehensive income unless the revaluation offsets a previous impairment loss. Revaluation reserves show the net revaluation of the owner-occupied property.

Contingency reserves

The Danish contingency reserve is recognized as part of retained earnings under equity. The reserve may be released in accordance to the specific regulations considering lowered insurance technical provisions or else only when so permitted by the Danish Financial Supervisory Authority and when it is for the benefit of the

policyholders. The funds allocated to the contingency reserve are not taxed and there has been no deferred tax allocated in the balance sheet.

The Swedish contingency reserve is reported as an untaxed reserve. Changes are recognized through equity. The basis for the calculation is based on a directive from the Swedish Financial Supervisory Authority. The directive indicates the maximum amount that may be allocated to the contingency reserve, based on written premiums and the provision for claims outstanding. ERV Sweden continuously calculates the maximum scope for provisions. At year-end the company had not utilized the maximum scope.

Other reserves

The total net revaluation of capital holdings in affiliated and associated companies is recognized via appropriation of profit to the net revaluation reserve in equity (other reserves), if the book value is higher than the cost price.

Currency adjustments comprise exchange differences arising from translation of the contingency reserve and the equity of foreign entities at the beginning of the year to the exchange rate prevailing at the balance sheet date.

Proposed dividend

The proposed dividend is recognized as a liability at the time of the adoption by the shareholders at the annual general meeting. Dividend to be paid out for the year is shown as a separate item under equity.

TECHNICAL RESERVES

Provisions for insurance contracts

The company have chosen to use the simplified calculation of premium provision according to the Danish Executive Order on Financial Statements § 69a.

Provisions for insurance contracts are recognised as future payments including payments for administration and claims handling regarding future events for in-force policies. However, as a minimum to the part of the premium calculated using the pro rata temporis principle until the next payment date. Adjustments are made to reflect any variations in the incidence of risk. For new annual insurance policies, where a considerable part of the risk is in the immediate continuation of the date they become effective, we add as income 50% of the premium within the first 2-3 weeks and then distribute the rest according to the pro rata temporis principle.

The provisions also include amounts reserved to cover risk in connection with increasing age. These provisions are reserved when there no longer is a natural premium and the risks covered increase with the insured person's age.

The provisions for insurance contracts are recognised, taking into account, the deductions for direct acquisition costs.

Provisions for claims

Provisions for claims include direct and indirect claims handling costs arising from

events that have occurred up to the balance sheet date. Provisions for claims are estimated using the input of assessments for individual cases reported to the company and statistical analyses for the claims incurred but not reported and the expected ultimate cost of more complex claims that may be affected by external factors (such as court decisions).

Claims provisions are discounted, if such discounting is material. Discounting is based on the risk-free interest rates announced by EIOPA without volatility adjustment.

Risk margin on insurance contracts

Risk margin on insurance contracts are the expected amount payable if the company's portfolio of insurance contracts were transferred to another company.

Provisions for bonus and premium rebates

Provisions for bonus and premium rebates represent amounts expected to be paid to policyholders in view of the claims experience during the financial year.

Liability adequacy test

Tests are continuously performed to ensure the adequacy of the technical provisions. In performing these tests, current best estimates of future cash flows of claims, gains and direct and indirect claims handling costs are used. Any deficiency is charged to the income statement by raising the relevant provision.

Financial liabilities

Bond loans, debt to credit institutions, etc. are recognised at the raising of the loan at a fair value plus transaction costs incurred.

Debt

Other liabilities are measured at net realisable value.

Methods for calculating financial ratios

The financial ratios have been calculated in accordance to the Danish Financial Business Act. The ratios included in the five-year review have been calculated as described below:

Gross claims ratio is the relation between gross claims incurred and gross earned premiums, where earned premiums are reduced by bonuses and rebates.

Gross expense ratio is the relation gross operating expenses and gross earned premiums less bonuses and rebates.

Reinsurance ratio is the profit/loss from reinsurance in proportion to gross earned premiums less bonuses and rebates.

Combined ratio is the sum of the gross claims ratio, the gross expense ratio and the net reinsurance ratio.

Operating ratio is calculated as the combined ratio, but based on the claims ratio, the expense ratio and the net reinsurance ratio where the allocated investment return has been added to earned premiums in the denominator.

Relative run-off result is the run-off result in relation to the corresponding opening provision.

Return on capital and reserves is profit of the year in relation to average capital & reserves.

24 Contingency liabilities

The Company has outsourced IT services and has in this regard contingency liabilities of approximately DKK 4.675t as of 31 December 2022.

The Company is jointly tax liable with the Danish enterprises in the Munich RE group and is administering the joint taxation. The Company is liable jointly and severally with other enterprises in the joint taxation of Danish company tax, withholding taxes on dividends, interests and royalties in the joint taxation. The joint tax obligation represents nominal net payable of approximately DKK 1.458t as of 31 December 2022.

The Company has a rent contract in regards to the Swedish branch office and has in this regard contingency liabilities of approximately DKK 667t as of 31 December 2022.

25 Ownership and related parties

Europæiske Rejseforsikring A/S is a 100% owned subsidiary of ERV AG, Munich, Germany

ERV AG, Munich, is a 100% owned subsidiary of ERGO Group AG, Düsseldorf, Germany.

ERGO Group AG, Düsseldorf, Germany, is 100% owned by Münchener Rückversicherungs-Gesellschaft Aktiengesellschaft, Munich, Germany.

The annual report for ERGO Group AG can be ordered on <http://www.ergo.com/>

The annual report for Münchener Rückversicherungs-Gesellschaft Aktiengesellschaft can be ordered on <http://www.munichre.com/>

Intra-group transactions

The remuneration for the administration of the group's companies is based on the costs of such administration. The interest charged on inter-company accounts is the market rate when these accounts are not considered current business accounts.

25 Ownership and related parties (continued)

Other services (including assistance services, asset management and reinsurance) rendered as part of ordinary insurance operations to and from inter-company buyers are settled at market rates.

Inter-company trading in assets, including securities, is conducted at market prices,

Consolidated accounts

The company has chosen not to prepare consolidated accounts in accordance with §134 in the executive order issued by the Danish Financial Supervisory Authority on financial reports for insurance companies and profession-specific pension funds, as the company's ultimate parent company, MÖnchener RÖckversicherungsgesellschaft, Munich, Germany, prepare consolidated accounts for the whole group.

Remuneration of the Board of Management and the Board of Directors is disclosed in note 7.

26 Risk Management

Underwriting risks

Underwriting risk arises from inaccurate assessments of the compensations and other costs related to insurance policies. Significant underwriting risks are premium, if losses are higher than expected, and reserve risks, if the reserves set side are not sufficient to cover the ultimate losses,

Relevant policies exist which are set by the Board of Directors. The overarching policy for underwriting risks states that risks originating from the company's insurance business shall be covered or limited to such a level that the company will be able to maintain a normal operation and carry out planned initiatives even in case of a very unfavourable development. One measure taken to limit the underwriting risk, is reinsurance agreements. This limits the risks for most events to a certain level according to the risk appetite set by the Board of Directors.

Market risks

It is the aim of ERV Nordic to control the market risks in such a way that the company obtains a return corresponding to risks taken.

Main market risks:

- Currency risk
- Equity risk
- Property risk
- Market risk concentrations

Currency risk arises as a result of a mismatch in the value of assets and liabilities in the same foreign currency. Internal guidelines, set by the Board of Directors, limits the exposure to a certain level. In terms of the result, the company is sensitive towards the development in currency rates and the prices of bonds, shares and participations.

Currency risk for ERV Nordic is mainly related to the net assets in ERV Sweden denominated in Swedish krona ("SEK"). The merger with ERV Sweden are based on strategic decisions and in line with the risk appetite set by the Board of Directors

26 Risk Management (continued)

Credit risks

Credit risk is defined as an economic loss that can arise if the financial situation of a counterparty changes. The credit risk includes both the risk of deterioration of the "rating" of the counterparty and the credit spread risk. Examples are the financial situation of an issuer of securities or a debtor with obligations to ERV Nordic.

In our fixed-income investments, we control the associated credit risk by selecting issuers with appropriate quality and respecting counterparty limits. The rating of external rating agencies is just one of several criteria that we take into account. The majority of our investments consist of securities issued by issuers with very good credit ratings.

Operational risks

Operational risk is the risk of loss resulting from inadequate or failed internal processes, people and systems or from external events. Operational risk is inevitably linked to the business activities of ERV Nordic. They are addressed in a comprehensive internal control system or through ad-hoc reporting.

ERV Nordic manages operational risks in accordance with internal guidelines and the risk appetite on an ongoing basis. It is reported to the Board of Directors as part of the risk report on a quarterly basis.

Other material risks

ERV Nordic is also exposed to strategic and reputational risks.

Strategic risks are risks arising from wrong business decisions or poor implementation of decisions already taken. ERV Nordic is exposed to a variety of strategic risks such as changes in the customer structure ("demography") and the buying behaviour ("digital disruption"). Additional risks may arise as a result of changes in the competitive environment. Strategic risks usually have an impact lasting over several years and when identified, they are analysed and remedial measures are taken when necessary.

Reputational risk is defined as the risk of damage that occurs if the value or brand name of ERV Nordic deteriorates. The impact ranges from reduced business opportunity to administrative additional expenses.

Ad hoc reporting and regular quarterly communication between the governance functions takes place. In addition, as part of the internal control system, a basic assessment of potential reputational loss for each operational risk is completed by both the Compliance Officer and the Risk Manager. If the risk is assessed as being above the process owner's acceptable range, then a measure is required and monitored.

27 Fair value hierarchy

“Quoted market prices and consolidated reference prices” (level 1) consists of financial instruments that are quoted and traded in an active market. Such instruments include mainly our Danish and Swedish government bonds. Valuation based on “observable input” (level 2) consists of financial instruments that are valued substantially on the basis of observable input other than quoted price or consolidated reference price for the instrument itself. Valuation based on significant “nonobservable input” (level 3) consist of certain financial instruments based substantially on non-observable input. Such instruments include our shares in affiliated and associated companies and our investment property.

Note in DKK'000

| 2022 | Quoted market prices or consolidated references price (level 1) | Observable input (level 2) | Non-observable input (level 3) | Total |
